38%.

We know that both outcomes have an implied probability of 52.

38%.

This seems easy, but how do you find true odds? Essentially, true odds are subjective.

If true probability > implied probability, that is a good bet to take.

By using our odds calculator, you can calculate the implied probability of either team winning.

In this scenario, the implied probability that the book is giving for the Titans to win is 60%.

It is important to note that if your true probability is higher than the implied probability that a sportsbook is giving you, then that is a valuable bet.

Start by drawing a 10 by 10 grid on a large poster board with enough space in each square to record your player's initials and their projected score for the game.

Once you have the board set up, ask friends and family members if they want to pay to choose a square on the board.

If you want to add an element of surprise to the game, draw numbers from a hat to assign each player a potential score.

At the end of the game, pay the winners the money that you gathered from all of the participants.

About our Match Predictions and Cricket Betting Tips

Our match predictions are written exclusively by professional cricket writers.

Here we will post today's match predictions and analysis on the upcoming cricket matches that are being played around the globe.

Sometimes in hectic leagues that is not possible because we have to take into account the last games played by both teams before making a prediction.

We will also analyze and give our Dream11 predictions which includes analysis and a Dream11 team prediction.

As mentioned, we will always give a betting tip based on our thoughts on who will win today's match, but we will also add in a few bonus bets we like based on the different matches, teams and players in action.
