So let's say, if you choose your games carefully, you can easily get through 30 or 60 rounds in a row and that's what makes this strategy great. The system of this strategy is progressive, meaning you have to bet all-in in every round with the previous winnings you have accumulated.

Find a game which you're confident will not end with a 0-0 draw. Statistically first goals are scored around this time. In case the first half is coming to an end and is without goals then place the bet during halftime.

For instance, if you placed your bets at estimated odds of 1.10, 30 consecutive wins will multiply your stake 17 times:  $5 \times 1.10^{30} = 85$  €. Whereas, if you placed your bets at around 1.05.
